

Theodorus Fidelis Samangun (21 y.o)

Informatics Engineering student & Web Developer Enthusiast

Bali, Indonesia | Phone: 081236032077 | Email: theosamangun468@gmail.com

Github: <https://github.com/ozekun>

PROFILE

A 5th-semester Informatics Engineering student at Institut Bisnis dan Teknologi Indonesia (INSTIKI) with a 3.86 GPA. Highly passionate about web development and data analysis. Proficient in utilizing PHP and JAVA across various academic projects. Currently seeking a Web Developer or Mobile Developer internship opportunity to apply academic knowledge and technical skills in a real-world industry environment.

EDUCATION

INSTITUT BISNIS DAN TEKNOLOGI INDONESIA (INSTIKI)

Bachelor of Informatics - Currently in 5th Semester GPA [3.86]

PROJECT EXPERIENCES

Web-Based Family Tree & Community Portal (One Family)

Project Creator (20 July 2026 - 30 July 2026)

- Developed and deployed a dynamic full-stack web application using ReactJS and Firebase to manage family member records with full CRUD capabilities.
- Structured NoSQL document schemas in Cloud Firestore to model complex family tree relational data and enable real-time UI updates.
- Designed and built a highly responsive, component-driven User Interface (UI) in ReactJS, integrating GitHub for version control and deployment management.

Church Liturgy Graphics Controller (Teks Misa)

Project Creator (1 August 2026 - 9 August 2026)

- Developed a responsive web controller using Next.js and Supabase to streamline live liturgy text updates for church livestreams via SPX Graphics API.
- Implemented multi-user real-time state management to prevent operational editing conflicts during live mass broadcasts and automated 30-day historical data logs.
- Designed a dual-mode (Light/Dark) dashboard featuring real-time lyric previews, active connection status, and admin configuration controls using Tailwind CSS.

ORGANIZATIONAL EXPERIENCES

Information Technology Development Club (IDC) - TECHFEST Event Program Staff

March 2025 - June 2025

- Served as the Person in Charge (PIC) to oversee overall event execution, team coordination, and stage operations.
- Formulated comprehensive event rundowns, speaker schedules, and contingency plans to ensure smooth event flow.

KOMSOS SANAMARI - Gianyar, Bali, Indonesia

September 2021 - Now

- Operated live graphics, camera feeds, and visual display software to ensure seamless presentation during church services.
- Managed audio mixer controls and sound levels while serving as Secretary to handle administrative records and team correspondence.
- Developed a web-based Mass running text system using Next.js, Supabase, and REST APIs to streamline the management and display of liturgical texts during church services.

HARD SKILLS

- Programming: Java, Python, PHP
- Frameworks: Laravel, React.Js, Next.Js
- Database: MySQL, PostgreSQL, Firebase, Supabase
- Tools: Visual Studio Code, Antigravity, Google Colab, Figma, Stitch
- Core Concept: Full-Stack Web Development, Object-Oriented Programming (OOP), SaaS Architecture, Real-Time Data Synchronization, REST API Integration, Responsive Web Architecture
- Languages: Indonesian (Native), English (Basic)

SOFT SKILLS

- Teamwork
- Highly motivated
- Analytical skills
- Highly organized
- Eager to Learn
- Event Management & Leadership
